

Bringing New

Technology

to light...

WORLDTECH
INTERNATIONAL

WorldTech International

WorldTech International specializes in technology consulting and knowledge systems development to identify and assess emerging technologies and scientific discoveries worldwide. We are backed by a world-class team of scientists and technology experts, and powered by state-of-the-art information systems and analysis tools. We use these resources to investigate the world's R&D markets and match the most promising technologies with our customers' requirements.

WorldTech International clients have a range of needs. Our suite of products and services can be tailored to help them improve their decision-making processes and meet their open innovation and/or strategic needs related to mission-critical systems and solutions.

We focus on maximizing our clients' ability to:

- ***Monitor trends in technologies and the industry***
- ***Identify potential partners or markets***
- ***Assess licensing or acquisition opportunities***
- ***Maintain an awareness and understanding of the technology and science marketplace***

Capabilities and Competitive Advantages

Global Scouting

Our systematic visits to U.S. and international markets for venture capital meetings, science and technology symposiums and other events allow us to maintain first-hand awareness of R&D efforts worldwide.

Technology Intelligence

We collect and synthesize open source information with unrivaled expertise, performing analyses and reviews of status, trends and state-of-knowledge within the industry.

Technology Assessments

Our collaborative peer review process screens and/or assesses new technology capabilities and limitations at both the system and component levels, rates them against similar competing technologies and determines how well they meet customer needs.

NEWTON

Our unique online system, NEWTON, includes a suite of powerful tools for information capture, fusion and concept extraction. The system allows us to easily process, organize and visualize disparate worldwide technology data.

Subject Matter Network

Our robust and growing worldwide network of subject matter experts serves as a force multiplier, extending our reach into countries and institutions that would otherwise be difficult to penetrate.

*Customizing our unsurpassed technology
information services to fit clients' needs.*
